

Handled

Business Plan & 12-Month Operating Plan

Home & business services, handled. Metro Detroit launch, built to scale nationwide.

Year 1 gross bookings	\$785k
Year 1 revenue (our take)	\$207k
Year 1 net operating income	\$27.4k
Break-even month	Feb 27
Startup paid back	Sep 27

Prepared October 07, 2026 · Base case (conservative, self-funded). Growth case shown for comparison.

Executive summary

Handled is one company and one app for home and business services: cleaning, lawn and snow, hauling, repairs, trades, remodels, errands, events and rides. Customers get an upfront price in about a minute, a vetted and insured pro, photo-checked work and a 30-day make-it-right guarantee. Handled keeps 15–35% of every job (like Uber) and pays pros only from money already collected, so no job can lose money.

What's new since the October 1 plan (built and live):

- **Accounting:** Xero is the books of record; every day of Stripe activity, business invoices and pro payouts post automatically.
- **Grand opening:** up to 20% off every booking for the first 100 days, with a live countdown; then a Grand Opening banner.
- **Referral Partner Program:** realtors, property managers, contractors and neighbors earn 10% of our fee for 12 months on customers they send.
- **Measured pricing:** lawns, snow, trees, junk, deliveries and more are priced from real measurements (sq ft, lb, cu yd).
- **Bid engine deal-maker:** public bids are priced for the best expected profit, anchored on past awards and on what our own customers pay.
- **Pro rules:** pros pick up to 3 trades; residential cleaners need no license or bond (bond only for \$1,500+ commercial jobs); instant pay at 1.75%.
- **Sign-in:** one email with a code and a link that works on any device, for customers, businesses, pros, partners and staff.

Year 1 at a glance (base case)

	Q1 (Nov–Jan)	Q2 (Feb–Apr)	Q3 (May–Jul)	Q4 (Aug–Oct)	Year 1
Gross bookings	\$84k	\$168k	\$238k	\$295k	\$785k
Our take (revenue)	\$12.8k	\$45.2k	\$66.6k	\$82.6k	\$207.3k
Grand opening discounts	\$10.7k	\$1.8k	\$0.0k	\$0.0k	\$12.5k
Operating expenses	\$16.2k	\$26.3k	\$39.1k	\$46.4k	\$128.0k
Net operating income	-\$7.5k	\$7.9k	\$11.2k	\$15.8k	\$27.4k

The first three months run at a small loss on purpose: the grand opening discount (about \$12.5k in year 1) buys the first customers, reviews and recurring plans. The business turns profitable in Feb 27 and earns back the \$18k startup cost in Sep 27. Spending stays inside the plan's rule: operating costs at or below 85% of net take once the promotion ends.

Spending check: operating costs plus IEBC and partner commissions come to 84% of net take for the year (plan rule: 85% or less).

Growth case for comparison: the October 4 growth plan targets \$0.5M of take in year 1 (\$2.5M bookings), which needs business accounts and outside capital earlier. The base case below is what the business can do self-funded.

12-month projected income statement — base case (Nov 2026 – Oct 2027)

	Nov 26	Dec 26	Jan 27	Feb 27	Mar 27	Apr 27	May 27	Jun 27	Jul 27	Aug 27	Sep 27	Oct 27	Year 1

Dollars; (parentheses) = cost or loss. Taxes not shown (LLC income passes through to the owner). Gross bookings are at list price; customer payments are after the grand opening discount.

Assumptions behind the numbers

Bookings ramp	\$18k in month 1 to \$105k in month 12 (\$785k year 1)	Business plan base case (\$0.67M) plus the grand opening and partner boost
Our take	28% blended of list price	35% cleaning/hauling, 30% lawn/handyman, 25% trees, 20% rides, 15% remodels
Grand opening	75% of bookings discounted, 17% average ("up to 20%", capped so we keep 5%); Nov 2 – Feb 9	Hub → Website & promotions; discount comes out of our take, pros paid in full
Card processing	3.0% of customer payments	Stripe 2.9% + 30¢
Guarantee reserve	1% of customer payments	30-day make-it-right guarantee
Referral partners	3% → 20% of bookings referred; partners earn 10% of our take	Partner Program (paid after the 30-day window)
IEBC AI workforce	10% of net take	Business plan \$3 revenue share
People	Founder draw from month 2; part-time ops; full-time ops & quality lead from May (Gusto)	Business plan team table, paced to cash
Marketing	\$2.5k → \$6k a month: Google Business Profile, local service ads, Nextdoor, flyers, partner kits	Detroit cleaning marketing plan
Technology	Vercel, Supabase, Resend, Twilio, Claude AI (~\$0.50/job)	Current stack
Software	Xero, Gusto (from first W-2 hire), Instantly, Google Workspace	Current stack
Startup (one-time)	\$18k before launch	LLC, first insurance premium, legal review, trademark, brand

Biggest swings: the blended take (every point is about \$8k a year), how many grand-opening customers stay at full price, and how fast business accounts and public contracts arrive. Hub → Finance and Xero show actuals against this plan every month.

52-week operating plan

Week 1 starts Monday, October 12, 2026. Soft launch and the grand opening begin in week 4 (November 2).

Wk	Starts	Focus	Key actions	Target
1	Oct 12	Go-live setup	Run the pending Supabase SQL; Resend domain verified (/auth/check all green); Vercel production branch = main; NEXT_PUBLIC_SITE_URL set	Sign-in works for every role
2	Oct 19	Go-live setup	Stripe live keys + webhook; connect Xero (Hub → Accounting), create accounts, map checking; Gusto set up for future W-2 staff	Test booking paid end to end
3	Oct 26	Recruit pros	Post Indeed/Facebook jobs; approve first cleaners, haulers, lawn/snow crews (up to 3 trades each); background + ID checks	12 pros approved
4	Nov 02	Soft launch + grand opening	Grand opening starts Nov 2 (100-day countdown, up to 20% off); friends & family bookings; Google Business Profile live	First 10 paid jobs
5	Nov 09	Partner program	Pitch 25 realtors + 15 property managers on the referral program (/partners): 10% of our fee for 12 months	10 partners signed
6	Nov 16	Snow season prep	Sign seasonal snow plans (driveways measured in sq ft); line up 4 plow/shovel pros; business lots quoted	20 snow plans
7	Nov 23	Cleaning push	Detroit cleaning marketing plan: Nextdoor, local ads, move-out cleans for realtors' listings	25 cleanings booked
8	Nov 30	B2B pilots	Business sales engine (Hub → Business leads): pilot offers to offices, clinics, property managers	2 business pilots
9	Dec 07	Holiday rush	Holiday deep cleans, junk removal, event rentals; gift cards on the site	\$28k December bookings
10	Dec 14	Quality loop	Review every photo-QA flag; fix pricing accuracy outliers; 4.8+ rating target	QA pass ≥ 85%
11	Dec 21	Year-end close	Xero month-end close; 1099 worksheet for pros and partners; CPA review	Books closed for 2026
12	Dec 28	Recurring plans	Convert one-time customers to biweekly plans (AI-timed offer); Handled Plus memberships	40 recurring customers
13	Jan 04	Gov contracts	Bid engine: 3 cleaning/facility bids (measured lines, deal-maker pricing); register SAM/City of Detroit	3 bids submitted
14	Jan 11	Recruit wave 2	Fill supply gaps from Hub → Supply gaps; second pro per trade for backup coverage	25 pros approved
15	Jan 18	Grand opening final push	Countdown last 3 weeks: email past visitors, partners, waitlist; 'last chance' ads	Peak promo month
16	Jan 25	Grand opening ends Feb 9	Banner switches to 'Grand Opening — we're officially open' for 30 days; PR to local media	Retention ≥ 60% at full price
17	Feb 01	Grand Opening event	Grand Opening celebration + partner thank-you; reviews push (Google)	50 Google reviews
18	Feb 08	Price check	Compare full-price conversion after promo; adjust market factors per service	Take ≥ 27% blended
19	Feb 15	Commercial cleaning	Janitorial proposals (bonded crews for \$1,500+ jobs); factoring partner chosen for net-30 clients	3 commercial accounts
20	Feb 22	Spring lawn prep	Lawn plans sold with measured yard sq ft; aeration/fertilization upsells; recruit lawn crews	60 lawn plans pre-sold
21	Mar 01	Q1 review	Income statement vs plan; adjust marketing to best channel (attribution); city scorecard	Q1 profit target hit
22	Mar 08	Spring cleaning	Spring deep-clean campaign; windows, gutters, power washing	\$56k March bookings
23	Mar 15	Partner wave 2	Recruit 30 more partners (contractors, movers, stagers); partner payouts running Mondays	40 active partners
24	Mar 22	Lawn season live	Weekly lawn routes; route density bonuses keep pros loyal	150 lawn customers
25	Mar 29	Hire ops lead	First full-time ops & quality lead (Gusto payroll); AI-driven rate review	AI-driven ≥ 80%
26	Apr 05	Remodel pipeline	Free site visits for bath/kitchen remodels; milestone payments over ACH	2 remodels signed
27	Apr 12	Gov bids round 2	Bid on spring/summer grounds contracts using learned market prices from paid jobs	1 contract won
28	Apr 19	Moves season	Small moves + junk removal for May–June moves; staging transport for realtors	\$72k May bookings
29	Apr 26	Customer success	Guarantee/redo audit; repeat-customer rate; referral credits	Repeat rate ≥ 35%

Wk	Starts	Focus	Key actions	Target
30	May 03	Q2 review	Half-year close in Xero; update 52-week plan; decide second city criteria	Half-year profitable
31	May 10	Summer events	Parties & events (catering, rentals, DJs); corporate BBQs	10 events booked
32	May 17	Pro rewards	Tier upgrades (Pro+/Elite); instant pay at 1.75%; guaranteed weekly minimums	Pro retention ≥ 85%
33	May 24	B2B expansion	Property-management portfolios: unit turnovers on terms (approved case by case)	8 business accounts
34	May 31	Marketing optimization	Shift budget to lowest cost-per-booking channel; test the Modern look in one market via ?theme=	Cost per booking < \$35
35	Jun 07	Fall prep	Leaf removal plans (measured yards); gutter season; snow plan renewals start	100 leaf jobs pre-sold
36	Jun 14	Back-to-school & move-ins	Move-in cleans, organizing, handyman	\$86k July bookings
37	Jun 21	Bid engine tune-up	Record every award/loss; deal-maker learns from results + paid invoices	Win rate ≥ 25%
38	Jun 28	Q3 review	Quarter close; profit vs cap (opex ≤ 85% of net take); hire B2B account manager?	Q3 on plan
39	Jul 05	Leaf season	Leaf removal + gutter cleaning peak; storm cleanup readiness	\$92k August bookings
40	Jul 12	Snow plans 2027-28	Sell next winter's seasonal snow plans early (measured driveways/lots)	150 snow plans
41	Jul 19	Second city scouting	City scorecard: pick next metro (Ann Arbor / Grand Rapids / Toledo) by demand + supply	Next city chosen
42	Jul 26	Recruit for city 2	Pro lead engine in the new city; partner outreach list	15 pros in pipeline
43	Aug 02	Holiday prep	Holiday cleaning + gift cards; corporate holiday events	Holiday calendar 50% booked
44	Aug 09	Operations review	AI-driven rate, QA, response times; automate the top 3 manual tasks	AI-driven ≥ 85%
45	Aug 16	Gov bids round 3	Winter facility/snow contracts with deal-maker pricing	2 bids submitted
46	Aug 23	Finance check	Annual budget for year 2 in Xero; line of credit sized to cash gap	Year-2 budget approved
47	Aug 30	City 2 soft launch prep	Constraint-driven launch set (junk, cleaning, lawn/snow, handyman); local partners	Launch date set
48	Sep 06	Year-end promotions	Handled Plus annual offer; partner bonus for top referrers	+50 Plus members
49	Sep 13	Year-end close	Xero close; 1099s for pros and partners (Stripe Connect tax forms); CPA	Books closed
50	Sep 20	Annual review	12-month income statement vs actuals; update the 5-year plan	Year 1 profitable
51	Sep 27	City 2 launch	Open city 2 with the launch set; grand opening playbook reused	First 10 jobs in city 2
52	Oct 04	Plan year 2	Set year-2 targets (\$2M take growth case); hiring plan; B2B portfolios	Year-2 plan published

Business plan

The October plan, unchanged except where noted above. Section numbers follow the original.

Home & business services. Handled. One company and one app for cleaning, organizing, windows, carpets, gutters, power washing, lawn, leaves, snow, trees, pet care, junk and large-item removal (priced by weight), week-long junk containers, handyman and licensed trades, interior and exterior painting, kitchen, bath and whole-home remodels, errands and a personal assistant, parties and events, and transportation (private drivers, airport transfers, limos, party buses, charter buses and event shuttles by licensed operators). Every job is done by vetted subcontractors and run by AI. A small human team manages it, and IEBC's AI workforce staffs the back office.

1. The model

Who it serves	Homeowner gets 3–5 contractor calls	The contractor's back office	The customer, end to end
How it earns	Sells leads to pros	SaaS fee per tech	15–35% of every completed job, taken off the top (like Uber)
Price	Quotes after calls	n/a	Instant upfront price (pricing engine + AI photo review)
Accountability	None after the lead	n/a	We dispatch, QA with photos, charge after QA, 30-day guarantee
Pros	Pay for leads	Pay for software	Pay nothing; get pre-sold jobs and fast payouts

It works like Uber. We find the customer, price the job, connect them to a vetted subcontractor and take our cut off the top. The customer pays us; we pay the pro what's left.

House & office cleaning, windows, carpets, gutters, junk & large-item removal	65%	35%
Lawn care, dog-poop removal, handyman, power washing, interior & exterior painting	70%	30%
Tree removal & trimming	75%	25%
Transportation (licensed operators: black car, limo, party bus, coach, shuttle)	80%	20%
Bath, kitchen & whole-home remodels	85%	15%

Why no job can lose money (enforced in code and in the database)

1. **Our take is always 15–35% of the price.** Every price, whether instant, AI-adjusted, set after a site visit or edited by staff, is split by one function (`splitJob` in `packages/core/src/pricing.ts`). The database also rejects any job or payout that would leave us below 15% (`supabase/migrations/20261001183000_take_rate_guard.sql`).
2. **Payouts round down**, so rounding can never cost us money.
3. **Pros are paid only from money we've collected.** A card that charges successfully releases the payout. If the charge fails, the payout is held. Invoiced jobs stay pending until payment arrives.
4. **No lead costs, no truck, no inventory.** Pros bring their own tools, insurance and vehicles, and do the free site visits for remodels and tree work.
5. **Guarantee redos are done by the original pro at no extra payout;** that's in the pro agreement. A 1% reserve covers the rare refund.
6. **Card fees (about 3%) come out of our take**, and every service still earns money after fees (unit-tested). Remodels and large invoices use ACH bank payments (about \$5 per payment) instead of cards.

Why it wins: the work that makes service businesses expensive to run is intake, quoting, scheduling, dispatch, follow-up, QA, collections and payouts. That is exactly the work AI now does well. A lead site can't do it because it never owns the job. Contractor software can't do it because it never owns the customer. We own both.

Revenue streams

1. **Recurring home plans:** cleaning, lawn and dog-waste removal on weekly, biweekly or monthly plans (10–20% plan discount). This is the base of the business, with predictable revenue and high lifetime value.
2. **One-time jobs:** junk and large-item removal, gutters, windows, carpets, handyman, tree work.
3. **Remodels:** kitchen, bath and whole-home. High tickets at our 15% floor, sold through a free site visit and paid by milestone over ACH.
4. **Commercial accounts:** offices, retail, restaurants, property managers and HOAs. One vendor for every site, net terms and an SLA dashboard.
5. (Later) Membership ("Handled+": priority booking and an annual home check-up), and resale of IEBC's operating stack to other service brands.

2. 80% AI-driven — the operating design

Definition (measured live in the Handled Hub): the *AI-driven rate* is the share of completed jobs that went from booking to paid with **zero human touches**. **Target:** $\geq 80\%$. A human touch is any manual edit, dispatch, QA approval or status change by staff (`apps/web/lib/metrics.ts`). Actions by IEBC's AI employees don't count as human touches. Approvals of their high-risk actions do.

Customer intake, Q&A, instant price	AI concierge (web + app) + pricing engine	—
Quote review from notes & photos	AI quote (Claude), clamped to $\pm 40\%$ guardrails	Firm price after site visits (remodel, tree)
Scheduling & dispatch	AI dispatcher (ranking + offers + auto re-dispatch on expiry)	Exceptions only (no eligible pro)
Customer updates, reminders, messages	Automated timeline + email; IEBC Diego Martinez (client care)	Escalations
Quality assurance	AI photo QA on every job	Review the ~10–20% the AI flags
Billing & collections	Stripe card-on-file, charged automatically after QA	Failed-charge follow-up
Pro payouts	Approved automatically when QA passes	Weekly payout run
Pro recruiting & screening	Website application + AI screen; IEBC Tyler Walsh	Final approval, interviews
Pro compliance	IEBC Marcus Hill flags expiring insurance	Verify COI and background check
Daily ops management	AI morning brief + 15-min sweep + IEBC Arthur Vance (dispatch)	Read the brief, clear alerts
Finance & pricing	IEBC Eleanor Wei (CFO agent), Finance page	Approve price changes and payouts
B2B sales	IEBC Elena Markov (accounts), Clara Dubois (lead gen)	Close and sign contracts

The small human team

1	3	GM/owner · Ops & quality lead · B2B sales / partnerships
2	5	+ Pro success (recruiting, field audits) · Remodel project manager
3	8	+ Market launcher (new metros) · 2nd remodel PM · Finance controller
4	11	+ Marketing lead · B2B account manager · Escalations specialist

5	14	+ 2nd market launcher · 3rd remodel PM · Data/AI ops analyst

Humans own **judgment, relationships and exceptions**: signing commercial contracts, remodel site visits, vetting pros in person, and making things right when a customer is upset. Everything repeatable runs on software and AI agents.

3. IEBC Remote Workforce — the showcase

Handled is IEBC's flagship proof that a **remote AI workforce can run a real company**:

- Nine IEBC AI employees are assigned to Handled departments (Handled Hub → **IEBC Workforce**). Each has scoped permissions and an autonomy level: *suggest, act with approval or autonomous*.
- They act through the IEBC Workforce API (/api/iebc/v1). Every call is logged, and high-risk actions (price changes, payouts, cancellations, activating pros, marketing emails) always wait for a human.
- A **usage meter** (calls and executed actions per agent per month) supports invoicing.

Billing recommendation: for Handled, IEBC bills a **revenue share: 10% of Handled's net take** (after card fees and reserve) instead of fixed seats. It grows with the business, and like everything else here it can never put Handled in the red. For outside companies, IEBC sells the same workforce per seat at **\$2,000–\$5,000 per agent per month**. Handled's results (AI-driven rate, profit per job, revenue per employee) are the case study. The usage meter in the Handled Hub shows the work behind each invoice.

4a. Growth plan to \$100M (revenue = our take)

Revenue here means **what we keep**, not what customers pay: "\$10M revenue needs about \$50M in gross marketplace volume at a 20% take." Our blended take is 25–30% on home jobs but lower on large B2B contracts, so the plan uses 20% to be safe. These numbers live in `packages/core/src/city-scorecard.ts` (GROWTH_PLAN) and drive Hub → City scorecard, the dashboard's AI target and the Monday digest.

1	Liquidity & proof of concept	\$0.5M	\$2.5M	1 (Metro Detroit)	80%
2	Liquidity & proof of concept	\$2M	\$10M	1	80%
3	B2B expansion	\$4M	\$20M	3	85%
4	B2B expansion	\$6.5M	\$32.5M	4	90%
5	\$10M	\$10M	\$50M	5	90%
6	Category dominance & regional scaling	\$25M	\$125M	10	95%
7	\$50M	\$50M	\$250M	15	95%
8	Regional scaling	\$65M	\$325M	20	95%
9	Network effects	\$82M	\$410M	30	95%
10	\$100M	\$100M	\$500M	40	95%

What has to be true:

1. **Business accounts carry the volume**. At 3–5 cities by year 5, each city must do roughly \$10M a year in

bookings: far more than homeowners alone. Property managers (unit turnovers), real estate teams (listing prep, move-out cleans), stagers (furniture moves), self-storage (cleanouts) and stores (same-day delivery) book every week. Built: business accounts with properties, team logins, dedicated pros, priority dispatch, pilot offers, and monthly invoicing on terms (Net 15/30/45), **approved case by case** with a credit limit; every account starts on prepay, and overdue invoices put terms on hold automatically.

2. **A sales engine for businesses.** Built: Hub → Business leads finds those companies, gets the contact email from their own site and sends a 3-email sequence with a pilot offer through a second Instantly campaign. Replies are answered the same day; LinkedIn and calls stay human.

3. **Constraint-driven launches.** A new city opens with a short launch set (junk removal, large items, small moves, cleaning, lawn, snow, handyman, unit turnovers); everything else shows "coming soon" with a waitlist. Widen the list as the city's scorecard gates pass. Open the next city only when one is "Ready to replicate".

4. **Automation keeps margins as volume grows.** AI-driven jobs rise from 80% to 95% by year 6.

5. **Year 6–7 is the steepest step** (\$10M → \$50M in two years). It needs 10–15 cities and national B2B portfolios (property-management and storage chains). The phase plan written earlier reached \$40M by year 8; this plan uses the owner's \$50M-by-year-7 goal. Change GROWTH_PLAN if the target moves.

Section 4 below is the original conservative, self-funded case (every year profitable, spending capped at 85% of net take). The growth plan needs outside capital or much faster B2B traction from year 3: the financial model should show both side by side.

4. Five-year plan — profitable every year (conservative bootstrap case)

How to read the numbers

- **Bookings (GMV):** everything customers pay. This is the "size" of the business.
- **Our take:** our 15–35% cut. This is our actual revenue, the way Uber reports it.
- **Net take:** our take minus card fees and the 1% guarantee reserve.
- **The spending rule:** total operating costs stay at or below **85% of net take**, so **at least 15% of net take is profit every year**. People, marketing, the IEBC workforce, tech and overhead each get a fixed share. We hire and spend only as the take grows.

Volume assumptions: recurring-plan customer about \$1,900/yr (mix of biweekly cleaning, weekly lawn and dog-poop plans). One-time job about \$290. Remodel about \$24,000. Commercial account about \$1,800/mo.

1	1 (Metro Detroit)	220	1,100	4	4	\$0.67M	\$0.20M (30%)	\$0.18M
2	1	700	3,200	14	14	\$2.33M	\$0.70M (30%)	\$0.62M
3	3	1,500	6,500	30	32	\$5.19M	\$1.57M (30%)	\$1.38M
4	5	2,500	10,500	50	55	\$8.98M	\$2.72M (30%)	\$2.40M
5	7	3,700	15,000	75	85	\$13.55M	\$4.10M (30%)	\$3.61M

Spending (capped at 85% of net take) and profit

1	\$71k	\$39k	\$18k	\$9k	\$14k	+\$27k	Founder + part-time ops
2	\$248k	\$136k	\$62k	\$31k	\$50k	+\$93k	3
3	\$553k	\$304k	\$138k	\$69k	\$111k	+\$207k	6
4	\$959k	\$527k	\$240k	\$120k	\$192k	+\$359k	10
5	\$1.45M	\$795k	\$361k	\$181k	\$289k	+\$542k	14

Every job earns money, and every year is in the black. The trade-off is speed: because we only spend what the business earns, year 1 is lean. The founder is paid from profit, and marketing has about \$35 to win each new customer.

That means leaning on free and cheap channels in year 1: a Google Business Profile, Nextdoor, referral credits, property managers, and IEBC's outreach agents (Clara Dubois, Elena Markov). If customers cost more than planned to win, growth slows down; the business doesn't go into the red.

The only money needed up front is about \$15–25k of one-time startup costs before the first job: the LLC, the first insurance premium, a legal review of the pro agreement, the domain and branding. That's an investment, not an operating loss.

What "\$10M" means — pick the target

\$10M in bookings (what customers pay through us)	Early year 5 (\$9M in year 4, \$13.5M in year 5)	The plan above
\$10M in our take (our actual revenue)	About year 8 at this pace	About \$33M in bookings: roughly 18 metros, or a much larger commercial book

Biggest levers to beat the plan

1. **Recurring mix.** Every one-time customer gets an AI-timed offer to switch to a plan. Plans are the cheapest revenue to keep.
2. **Commercial accounts.** One property manager can equal 50 homes, at no extra marketing cost.
3. **Keep the take near the top of the band.** Cleaning and hauling at 35%, remodels never below 15%.
4. **Route density.** Pros earn more per hour when their jobs are close together, which keeps good pros loyal without lowering our cut.
5. **Metro playbook.** A new metro opens only when existing metros' profit can fund it: about 25 vetted pros, local ads and one launcher.

5. Key metrics (all visible in the Handled Hub)

AI-driven rate (jobs with zero human touches)	≥ 80% (years 1–2) → 90% (years 4–5) → 95% (year 6+)
Booking → pro assigned	< 2 hours median
Offer acceptance rate	> 70%
QA pass rate (AI)	> 85%
Average rating	≥ 4.8
Recurring plan conversion (from one-time jobs)	> 20%
Our take per job	15–35% (enforced) · blended ≈ 30%
Net after card fees	> 0 on every job (enforced)
Operating costs	≤ 85% of net take
AI cost per completed job	< \$0.75
Bookings per employee	~\$750k (Y2) → ~\$1M (Y5)

6. 90-day launch plan

1–2	Name and trademark check, LLC, general liability + umbrella insurance, Stripe, Supabase + Vercel live, domain
2–4	Recruit and vet the first 25 pros in Metro Detroit (2+ per trade). Activate them in the Handled Hub
3–5	Assign IEBC agents, connect the MasterHub (IEBC_API_KEY), run 20 internal test jobs end to end
5–8	Soft launch: friends & family, Google Business Profile, local service ads for junk removal and cleaning (fastest payback)

8-12	First 3 commercial accounts; recurring plan push; publish the AI-driven rate weekly
------	---

Risks & mitigations

- **Worker classification:** pros are independent businesses with their own insurance and tools. They set their availability and accept or decline jobs. Get a labor-law review per state before launch.
- **Licensing:** remodel, tree work and some handyman tasks need licensed or insured contractors. The platform blocks dispatch to pros with expired insurance.
- **Quality incidents:** photo QA, a 30-day guarantee, a pro rating floor and automatic suspension rules.
- **AI errors:** price guardrails ($\pm 40\%$ of the rules engine), human approval for every high-risk action, and full audit logs (ai_runs, agent_actions).
