# IEBC · The Executive OS

Governed AI agent workforces for public agencies

CAPABILITY STATEMENT
2026

**IE Business Consultants (IEBC)** builds and runs AI agent workforces that take on an agency's repetitive back-office and constituent-service work. Agency staff stay in control: each agent has a written role, scoped permissions and an autonomy level the agency sets. High-risk actions wait for a named official's approval, and every action is logged for audit.

## CORE COMPETENCIES

- **Back-office automation:** intake, forms and document extraction, case triage and routing, records clean-up.
- **Constituent service agents:** 24/7 Tier-1/Tier-2 chat and email for 311 and service desks, multilingual, with handoff to staff.
- **Finance & audit automation:** invoice audit, vendor reconciliation, grant reporting, improper-payment flags. A human certifies every payment.
- **Process mapping:** turning manual SOPs into documented, measurable automated workflows (Lean Six Sigma method).
- **Data integration:** read-only connectors first, then least-privilege write access to approved systems under the agency's ATO.
- **Capture & proposal automation:** opportunity search, compliance matrices and bid workflows.

## DIFFERENTIATORS

- **Proven in production:** IEBC agents run dispatch, client care, compliance tracking and finance for a live multi-trade services company, Handled (affiliate).
- **Human oversight built in:** three autonomy levels (suggest / act with approval / autonomous), an approval queue, and complete action logs. Designed around OMB AI use and acquisition guidance.
- **Fast, low-risk start:** a fixed-price 30-day pilot with success measures agreed up front. A working proof of concept within 72 hours of data access.
- **No lock-in:** agency data and workflows are exportable, and agency data is never used to train third-party models.
- **Local:** Detroit-based small business.

## PAST PERFORMANCE

- **Handled (affiliate), 2026–present:** AI workforce operating a services marketplace with [X% of operational actions handled by agents] and [N human approvals per week].
- [Commercial client / pilot: name, scope, dates, result]

## COMPANY DATA

| | |
|---|---|
| Legal name | [IE Business Consultants LLC] |
| UEI | [pending SAM.gov] |
| CAGE | [pending] |
| Business size | Small business |
| Certifications | [HUBZone / GDBE / Detroit-Based, once approved] |
| Payment | Government purchase card accepted |

## NAICS

| | |
|---|---|
| 541511 | Custom computer programming |
| 541512 | Computer systems design |
| 541519 | Other computer services |
| 541611 | Admin. management consulting |
| 541690 | Other technical consulting |
| 518210 | Computing infrastructure & data processing |

## PSC

| | |
|---|---|
| DA01 | IT application development support |
| R408 | Program management support |
| R499 | Other professional services |

## HOSTING & SECURITY

- Deploys on FedRAMP-authorized cloud (AWS GovCloud / Azure Government) or the agency's environment.
- Row-level data isolation, encryption in transit and at rest, role-based access.
- Section 508 / WCAG 2.1 AA interfaces.
